

TATIANA TUDOR

JUNIOR DEVOPS ENGINEER

Tilburg, Netherlands | +31 6 8498 0751 | tatianatudor@icloud.com | github.com/Leorfy15

PROFESSIONAL SUMMARY

Junior DevOps Engineer completing an intensive DevOps Engineering Bootcamp, with hands-on experience designing, deploying and troubleshooting cloud-native environments across Microsoft Azure and AWS. Experienced with Kubernetes, Docker, Terraform, CI/CD, monitoring and cloud infrastructure through production-style projects on AKS and EKS. Currently building an Azure-based DevOps leadership experience from DHL Freight, including team management, incident resolution, process optimization and approximately 10% operational cost reduction.

TECHNICAL SKILLS

Cloud	Microsoft Azure (AKS, ACR, VMs, Azure Files, networking, Entra ID/OIDC); AWS (EKS, EC2, VPC, IAM, S3, DynamoDB, Route 53, ECR, CloudFront, ALB)
Infrastructure as Code	Terraform
Containers & Kubernetes	Docker, Kubernetes, Helm, NGINX Ingress, Horizontal Pod Autoscaler, Metrics Server
CI/CD & Automation	GitHub Actions, Azure OIDC, Ansible, Bash, Python scripting & automation
Observability	Prometheus, Grafana, Loki, Grafana Alloy
Security	Trivy, Cowrie SSH/Telnet Honeypot, Kubernetes Secrets, TLS/SSL
Data & Tools	MongoDB, PostgreSQL, Redis, Git, GitHub, kubectl, Azure CLI, AWS CLI, Linux

DEVOPS PROJECTS

Restauranty - Azure AKS DevOps Platform | Ironhack Final Project

- Containerized and deployed a multi-service application to Azure Kubernetes Service (AKS) using Docker and Kubernetes, with images stored in Azure Container Registry.
- Implemented CI/CD foundations with GitHub Actions and Azure OIDC authentication, plus Kubernetes Ingress, DNS and TLS/HTTPS for externally accessible services.
- Implemented observability with Prometheus, Grafana and Loki/Grafana Alloy for infrastructure, application and security monitoring.
- Integrated a Cowrie SSH/Telnet honeypot and exposed recent security events through an AI-assisted DevOps interface.
- Performed container vulnerability scanning with Trivy and identified HIGH/CRITICAL vulnerabilities across application images.
- Troubleshooted Kubernetes, networking, authentication, MongoDB, container and resource-management issues using kubectl, logs and Linux tooling.
- Included Azure infrastructure cost and resource optimization as part of the platform review.

Cloud-Native Voting Application on AWS EKS

- Designed and deployed a microservices voting application using Docker, Kubernetes and Amazon EKS.
- Provisioned AWS infrastructure with Terraform, including VPC, public/private subnets, route tables, NAT Gateway, security groups, EC2, S3 and DynamoDB remote state locking.
- Configured PostgreSQL, Redis and application services, plus NGINX Ingress, Route 53 DNS, cert-manager HTTPS and Horizontal Pod Autoscaling.
- Troubleshooted DNS, TLS, networking, CPU resource requests and Kubernetes deployment issues using kubectl and Linux tools.

PROFESSIONAL EXPERIENCE

Supervisor / Team Leader | DHL Freight Netherlands 2022 - Present

- Lead a team of seven employees and coordinate international transport and fleet operations across the Netherlands and Germany.
- Manage operational KPIs, service levels, customer requirements and issue resolution in a time-critical environment.
- Reduced operational costs by approximately 10% through process improvements and better resource planning.
- Improved operational visibility, implemented new customers and supported cross-functional projects.
- Coach team members, handle escalations and apply root-cause problem solving to operational incidents.

EDUCATION & DEVELOPMENT

DevOps Engineering Bootcamp | Ironhack Expected completion: September 2026

- Core topics: Linux, Git, Python, Docker, Kubernetes, Terraform, AWS, Microsoft Azure, CI/CD, networking, observability and Infrastructure as Code.

CERTIFICATIONS & ADDITIONAL INFORMATION

Certifications: Lean Green Belt | AWS Cloud Practitioner
Languages: Romanian - Native | English - Fluent | Dutch - A2
